High Five Award

Mujtaba Khan

Final Year Computer Engineering Student @ Universiti Teknologi
PETRONAS
Perak, Malaysia

Summary

As an Application Engineer Intern at Lattice Semiconductor, I collaborate with global engineering teams to design and deliver technical training for Field Application Engineers and channel partners. My responsibilities include reviewing lab materials, ensuring technical accuracy, and creating both live and on-demand training content. These experiences have allowed me to refine my skills in FPGA development, digital design, and technical communication. Currently pursuing a Bachelor of Engineering in Computer Engineering at Universiti Teknologi PETRONAS, I am motivated to advance my expertise in embedded systems, digital logic design, and FPGA/ASIC development. My academic journey, coupled with my professional experiences, drives me to contribute to cutting-edge innovations in semiconductor technologies and enhance my proficiency in hardware-software integration.

Experience

GDSC-UTP

1 year 4 months

Vice Lead, Technical Development
November 2025 - Present (6 months)

Member, Technical Development

January 2025 - November 2025 (11 months)

Supporting technical initiatives by collaborating on hackathons, industrial tours, events, projects, and workshops within the Technical Development Department.

Lattice Semiconductor

Application Engineer Intern

May 2025 - December 2025 (8 months)

Penang, Malaysia

I collaborate with global silicon, software, and solutions engineers to develop and deliver high-quality technical training for Field Application Engineers and channel partners. I review lab materials and hands-on tutorials to ensure technical accuracy and contribute to the creation of both live and on-demand training content. This role enables me to strengthen my skills and knowledge in FPGAs, digital design, training content development, web and API development, cloud services, user authentication, and technical communication.

Association of International Students UTP

Head of Media

January 2023 - April 2023 (4 months)

As Head of Media, I led a team to capture key moments and manage social media coverage. I ensured smooth coordination with other departments to effectively promote the events and engage the community. My role required strong leadership and attention to detail to showcase the event's success.

Education

Universiti Teknologi PETRONAS

Bachelor of Engineering - BE, Computer Engineering (Intelligent Robotics) · (January 2023 - December 2026)
